

We're changing...

Hydrotechnik UK's name is changing to better reflect an expanding range of testing capabilities.

A new era of **Innovation.**

Introducing
Hydrotechnik UK
Test Engineering Ltd

**Hydrotechnik UK Test Engineering is the home of
Hydrotechnik GmbH products in the UK**

From original Minimesse test points, microbore hoses & handheld dataloggers, Hydrotechnik GmbH are market leaders in portable hydraulic test equipment.

Trusted quality
A huge range of UK supplied & manufactured wired and wireless sensors, instrumentation & cloud software solutions for all industries.

Pressure, temperature, flow, level, position, force & more

High accuracy wired & wireless sensors and instrumentation for industrial, automotive, hazardous area & hydrogen applications, with solutions for all technical and budgetary requirements.

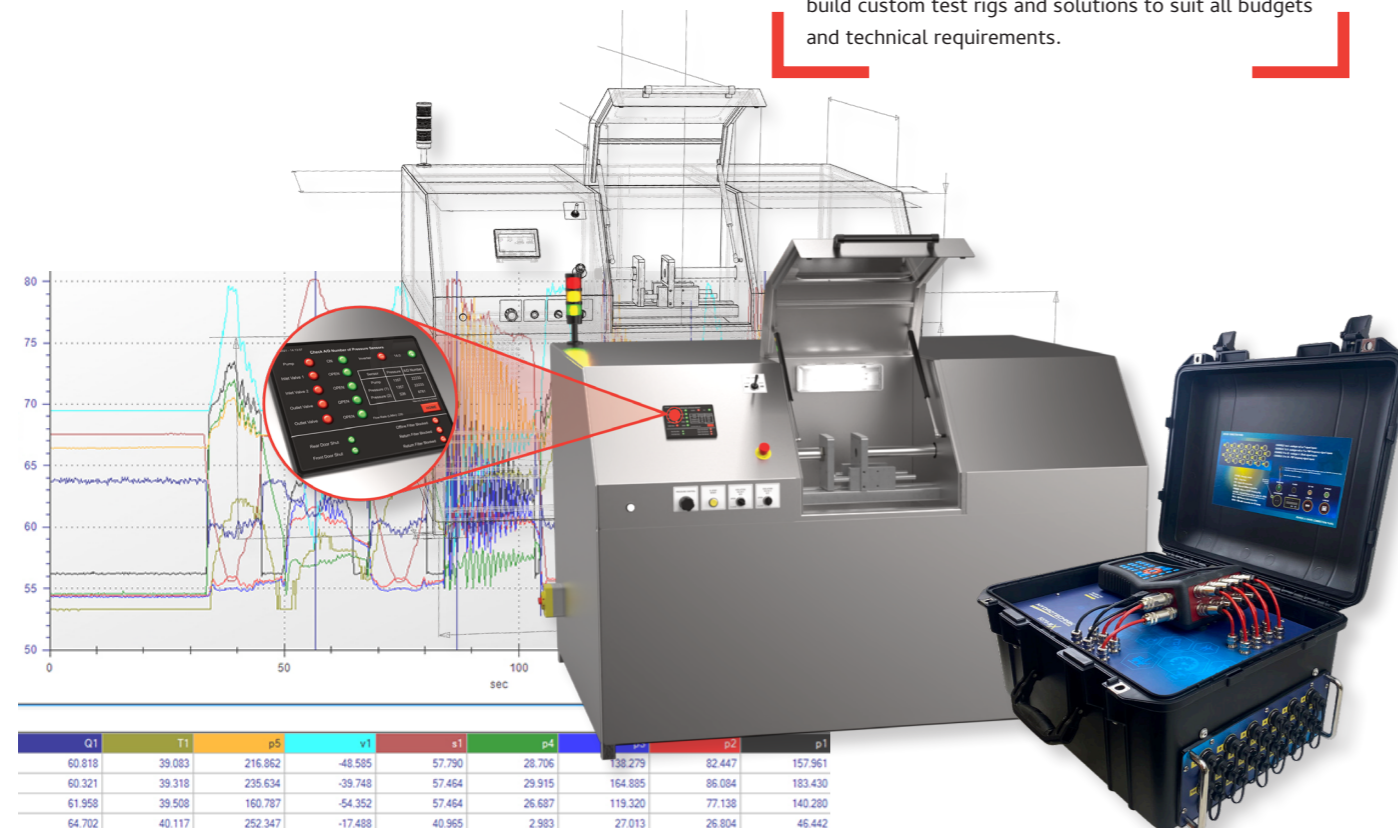

We design and develop test solutions for a huge range of applications

Inspired innovation

Bespoke hydraulic and hydrostatic test rigs & plc systems, designed & built in the UK.

Test rigs and custom test solutions

Component and system performance testing & proving from analogue testing kits to multi-channel high speed data acquisition all from concept to completion. Hydrotechnik UK Test Engineering Ltd can design & build custom test rigs and solutions to suit all budgets and technical requirements.

Everything in a box

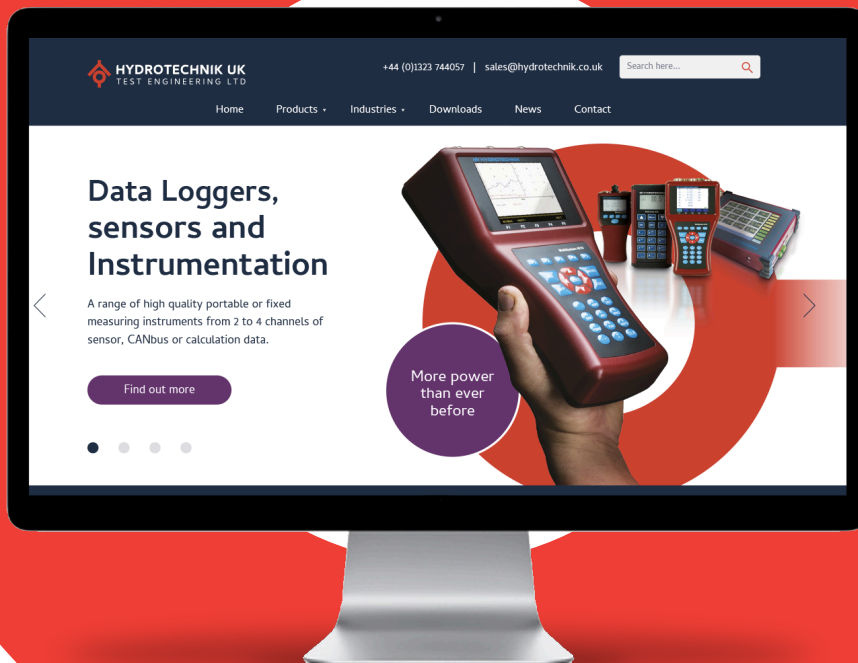

Multiple options of UK produced pressure test and gas charging kits for a worldwide market.

Bespoke test kits

Serialised production of UK produced pressure test and accumulator gas charging kits for service engineers.

Hydrotechnik UK Test Engineering Ltd
Experts in hydraulic & hydrostatic testing.
